

L-3 Communications Corp. (NYSE: LLL) is a publicly-traded Fortune 500 company operating within the government, defense and security markets.

A wholly-owned subsidiary of L-3 Communications Corp., **L-3 Security and Detection Systems** (L-3) is the world's leading supplier of X-ray screening solutions with 20,000 systems in operation worldwide. The company's Purdue Research Park-based regional office offers a broad array of solutions to the aviation, transportation and security markets including X-ray screening products for checkpoint passenger screening, advanced explosives detection systems, certified explosives detection systems (EDS) products and cargo screening applications.

L-3 has more than fifteen years of experience in precision dual-energy X-ray- (effective Z) based material discrimination and more than 1,000 of these automated systems in the field. This experience, coupled with the company's high-performance imaging, is unparalleled in the industry.

With more than 75 divisions and 60,000 employees worldwide, the New York City-based L-3 Communications' revenues exceeded \$12 billion in 2006.
